

IF YOU ARE SICK, STAY HOME!

If you're sick, stay home, rest, and remember to:

Cover your coughs and sneezes with a tissue or your sleeve.

Wash your hands often with soap and water.

Clean frequently touched surfaces and objects.

Please keep in mind that co-workers and members of the public may suffer from underlying medical conditions that can be complicated by exposure to respiratory illness such as COVID-19.

All employees should stay home if they are sick. CDC recommends that you stay home for at least 24 hours after your fever is gone. Your fever should be gone without the need to use a fever-reducing medicine.
